

JEREMY PANASUK

You built this fellowship for the American worker who never left the floor. I never left. Now I want Foundry and AIP in my hands.

New Auburn, WI · U.S. person · 715-970-0204 · jpanasuk@gmail.com

MEASURED LOCAL DECODE

CFO
HORIZON MILLING 2005

TRUSTED ON THE FLOOR Cargill · Horizon Milling · Dawn Foods · Micron · Mercedes · Toyota · PepsiCo · Ace · Kohl's · Navy Federal · Smith & Nephew · BNY · JPMorgan

You asked for builders who will wire a sensor, flash firmware, or ship production code. Who read a messy CSV and think instrument, automate, optimize. Who do not wait for perfect specs. Twenty years on live plants, then two years of Docker, WSL, Python, and agents until the numbers showed up in SQLite. This fellowship is 12 weeks of Foundry and AIP. I will treat it like a deployment.

01 — YOUR SIGNALS · MY PROOF

FACTORY FLOOR · 4+ YEARS ASKED · 20 DELIVERED

Cargill oils plants: BA overseeing plant ERP implementation — live operations, not a sandbox. Horizon Milling: production visibility on a time dimension so plants and accounting saw the same facts — CFO Award 2005 (six awarded that year). Dawn Foods PowerExchange CDC on AS/400 remote journals: warehouse load 8h → 1h, Type 2 DW, featured on informatica.com. Micron fab EDW, 2,080h → 7,000h, zero downtime. Mercedes +200% on the longest workflows; playbook stayed with the team. Toyota Engine Management go-live, all consultants 5/5.

GARAGE SHOP · FIREWORKS · THEN A GPU

Secret Key Class B shooter, 1996–2004. Fireworks Forever inventory manager and sales lead — \$800K+ seasonal stock, 6 consecutive years of profit growth, 100-hour peak weeks. Load, wire, shoot, tear down. No schema, no second take. Then I put a private RTX 4070 in the garage and measured it. You asked for garage-shop builders who automate a physical process. I already lived the shop. Then I instrumented the stack.

PYTHON · SQL · LINUX · GIT · DOCKER · WSL

Daily. Tabby Tavern on WSL2 + CUDA: TabbyAPI EXL3, Ollama, Open WebUI, SillyTavern, SearXNG, flash-attention, q8 KV cache. local_grid_suite: discovery, decode/prefill benches, GPU routing, SQLite, CLI + PDF. Headline 1.39 → 37.47 tok/s after routing (~27×). Warm stream ~76 tok/s. Dockroot-MCP. OpenClaw WhatsApp agents, 10+ skills. TypeScript for this packet. I taught myself the new stack the same way I learned the plants — by shipping.

MESSY CSV · UNOFFICIAL SPECS · ITERATE

AS/400 journals the MES does not see. SOAP that never matched the WSDL. Unofficial definition of a good part. Demantra demand planning — won Quarterly Award for Excellence, Oct 2006, separate from the oils ERP. Milwaukee insurer: platform dark three months; I closed it in two days on one buried IBM DB2 driver. 19 of 20 crisis accounts recovered. Prototype, test, learn on the fly. Perfect specs never arrived. That is the fellowship muscle.

02 — INDEPENDENT LAB · AUG 2024 – PRESENT · THE AIP-ERA STACK I ALREADY RUN

4070 · TABBIE TAVERN STACK

Containerized private inference on RTX 4070 / WSL2: Docker Compose, CUDA, GPU passthrough. Bring-up, auth, and security notes treated as ops, not a demo folder. huggingface.co/jpanasuk/tabby-tavern-stack

27× · LOCAL GRID SUITE

Operator telemetry: model discovery, decode/prefill, GPU routing, SQLite logs, CLI + PDF reports. Constant test loops — not one lucky run. github.com/jpanasuk-netizen/local_grid_suite

MCP · DOCKROOT-MCP

Bounded agent visibility into Docker services and network wiring — not host-root. Same production discipline as Fortune-100 Grid/HA: measure the boundary, then hand the agent the boundary.

AGENTS · OPENCLAW + PIPELINE

Systems → architect → validator over local Ollama: structured output, repair retries, collision checks. Production WhatsApp agents. Multi-provider routing with cloud failover. Hermes Agent on the same box.

Also retained through 2025 for Informatica production rescue: Grid/HA, PowerExchange CDC, IDQ, v9/v10 upgrades, SOAP/REST tuning, SOW/sizing, install-to-go-live. Operator floor: jpanasuk-netizen.github.io/the-closer

HOOR ONE ON THE FLOOR

I do not ask for a clean schema. I walk the line, find the unofficial definition of a good part, and pull the journal the MES does not see. What broke last Tuesday at 2 a.m. is the ontology. Palantir's job is to make that ontology executable on Foundry and AIP. That is the work I already do — I want your stack, not a toy dashboard.

HARDWARE / FIRMWARE — HONEST

I will not fake Verilog or ladder logic. I will wire, flash, and learn whatever the plant needs. Palantir asked for hunger, not a fake FPGA resume. I have Linux, Git, containers, production Python, SQL, and twenty years of physical operations. The rest I will take from Ontologize and the floor.

Unpaid. Remote. Starts 15 September 2026. Two weeknights. 5–10 hours. Ontologize. Professional certification on AIP / Foundry. Exceptional performers interview at Palantir or partners. I am not here for a stipend. I am here to crush the cohort, earn the cert, and walk through that door.

03 — SR. SOFTWARE DEVELOPER, TALEND · MOBE · MINNEAPOLIS

Live production data integration — mappings, pipelines, on-call

Jul 2023 — Aug 2024

Talend 8 mappings from simple through complex on a live production platform. GitLab CI/CD migrations. Amazon Redshift + SQL Server tuning. Sustained 99.99% stability. On-call incident command and root-cause writeups. Messy production, not a sandbox — the same motion the fellowship wants on Foundry.

04 — INFORMATICA SPECIALIST · TATA CONSULTANCY SERVICES

PepsiCo · Ameriprise · Ace Hardware — floor, governance, Big Data

Mar 2020 — Dec 2021

PepsiCo — Grid/HA + Data Integration Hub across NA/LATAM. Led v9→v10 with zero data loss. Teradata → Big Data (~40% analytics lift). Follow-the-sun with offshore. **Ace Hardware** — Teradata warehouse → Big Data objects and runtimes. Business + QA deploy path; sat with the floor, not just the ticket queue. **Ameriprise** — Enterprise Data Governance: IDQ, EDC, Axon. 200+ critical data elements. 24×7 platform, patches, local DG rollout.

05 — CONSULTING MANAGER / PROGRAM MANAGER / SEAL · INFORMATICA · JUN 2008 — OCT 2019

Started as Analyst in 2008. Analyst → Sr. Analyst twice in four years. Sr. Analyst → Program Manager in ten. SEAL team. Teams of 7–14. v7–v10 upgrade specialist. Consultant of the Year runner-up (2016). Parachute closer: 20 troubled accounts entered, 19 recovered. The original forward-deployed motion — different badge. I sat with manufacturers, banks, and fabs from the line to the exec table and left a system the next shift could run. Ladder: Sr. Analyst → Principal Consultant → Technical Delivery Manager → Solution Delivery Manager → Program Manager / Consulting Manager.

SEAL TEAM	V7–V10 UPGRADES	19 / 20 RECOVERED	WORLD-FIRST GRID/HA + DR	TEAMS 7–14
-----------	-----------------	-------------------	--------------------------	------------

CARGILL CFO AWARD · 2005 Highest financial-project award. Six awarded that year. Horizon Milling time-dimension visibility.	QUARTERLY EXCELLENCE · 2006 Demantra demand planning design and implementation. Separate from the oils plant ERP.	CONSULTANT OF THE YEAR RUNNER-UP · 2016 Micron: grew a 2,080-hour fab program to 7,000 hours. \$3M extensions. Zero downtime.
--	--	---

8h→1h	Dawn Foods — PowerExchange CDC on AS/400 remote journals. Type 2 DW. Featured on informatica.com.	7,000h	Micron — fab EDW, Teradata + Hadoop. PowerExchange, Grid/HA, Fast Clone. Zero downtime.
+200%	Mercedes-Benz — parachute performance on longest workflows. Trained TCS on the path. Playbook stayed.	\$800k	Toyota — Engine Management go-live. All consultants 5/5. ~\$300k services + \$500k product.
20+ nodes	MF Global — world-first Grid/HA + DR on RHEL GFS. India, UK, New York, Chicago. Owned global DR.	\$2.3M+	BNY Mellon — Grid/HA with senior VPs, support, and CEO Sohaib Abbasi in the room.
\$10M+	JPMorgan Chase — enterprise DW / CoE roadmaps. ELA + professional services, senior management.	\$2M	Kohl's — v9 Grid/HA. AIX → commodity hardware. Presented through senior VPs.
\$600k	Smith & Nephew — FDA-validated Informatica platform. Licensing contention resolved.	3,000h	Navy Federal — Informatica + BI V1 from architecture through go-live training.
–50%	West Bend Mutual — real-time SOAP/XML runtime cut in half. Windows service enablement.	v9	Harvard — Version 9 upgrade. Off-load Solaris 8.1.1. Resource plan through hypercare.

Sr. Integration Engineer · Prime Therapeutics

Jan 2007 — Jun 2008

Technical lead for Medicare and Medication Therapy Management data marts. Analyst → Sr. Analyst on a 4/5 annual review; internal 5-star on trust. Delivered above grade-level. Quality first — the quote below is theirs.

Business Analyst, Oils Plants · Integration Associate · Cargill

Dec 2004 — Jan 2007

Oils plants: business analyst overseeing plant ERP implementation — live mill operations, not a PowerPoint ERP. I do not remember the product name; I remember the floor. **Demantra (separate):** demand planning. Won the Quarterly Award for Excellence, Oct 2006, for that work. **Horizon Milling:** production visibility on a time dimension so plants and accounting could see the same facts — CFO Award 2005. 24/7 warehouse / ODS support. This is the American manufacturing data Palantir wants on an ontology.

<i>"His knowledge not only of the Informatica suite but also at the operating system level has been truly invaluable."</i> DAWN FOODS · CLIENT	<i>"He's a rock star out at Dawn. The customer loves him and the sales team has been leaning on him hard."</i> INFORMATICA IPS · SALES
<i>"It is the belief of the infrastructure staff that you have sent one of the best that Informatica has to offer in Jeremy."</i> MF GLOBAL · INFRASTRUCTURE	<i>"I trusted that Jeremy would deliver, with quality... exceeded the expectations at someone of his grade level."</i> PRIME THERAPEUTICS

GARAGE · SECRET KEY / FIREWORKS FOREVER · CLASS B SHOOTER · INVENTORY + SALES · 1996–2004 Professional display work: load, wire, shoot, tear down. \$800K+ seasonal inventory. Six consecutive years of profit growth. 100-hour peak weeks. No schema, no second take. The American workshop Palantir is writing hymns about — I already lived it. Customer loyalty is priceless. High-autonomy only.
